PROJECTS

E-Commerce Website (MERN Stack)

Technologies Used: MongoDB, Express, React, Node.js, Tailwind CSS, RESTful APIs, JWT Authentication
- Developed a fully functional e-commerce website allowing users to browse products, add items to the cart, and complete the checkout process.
- Implemented secure user authentication using JWT for login/signup.
- Integrated MongoDB for storing user and product data, and implemented payment gateway integration for seamless transactions.
- Ensured the website is responsive and optimized using Tailwind CSS and React.
- Deployed the application on AWS and Dockerized the environment for easy scalability.

Netflix Clone (MERN Stack)

Technologies Used: MongoDB, Express, React, Node.js, WebSockets, Tailwind CSS, RESTful APIs
- Built a Netflix clone with a fully responsive UI, allowing users to stream and browse movies and TV shows.
- Implemented real-time features using WebSockets for live updates (e.g., recommendations and trending movies).
- Integrated a video streaming API to allow users to watch content directly on the platform.
- Created user authentication and allowed users to save their watchlists and preferences.
- Used MongoDB to manage movie data and user preferences.
